**What Sets Us Apart:**

We use top notch equipment valued at over \$105,000 to service your property. Our rear snowplow is quiet and efficient and provides down pressure to clean the paved surface significantly better than back dragging a conventional snowplow. We prepare our routes via software to provide you with the most efficient service. We flip our routes every time we go out to keep things fair for our customers. If you are in the middle of our route you should see little difference in our timing, if you are at the end of our route you will be first the next snow fall.

### Snow Removal Specifications

1. The term of service for snow removal services is for a 5 month period beginning November 15th and ending April 1st unless otherwise agreed to by both parties.
2. The contractor will clear the snow when there is an accumulation of 2 inches of snow due to falling snow in a single snow event (48hr period.) Snow that accumulates over several days, for example 3cm on Monday then another 3cm on Friday is the responsibility of the customer, as if it were a commercial property for these snow events the accumulation would be taken care of with salt. Since we have a back plow our trucks are not capable of carrying a salter. Please contact us and we can refer you to a reputable contractor that can provide you with a salt application, they will bill you directly per application.
3. For snowfalls of 6 inches or more the contractor will return to clear the windrow left by the city. If the city has already plowed the street when we make our visit we will not return to clean additional windrows caused the city pushing back snow banks.
4. Normally clearing operations will be conducted to allow for the arrival and departure of vehicles to and from work (typically 8:00 AM and 5:00 PM respectively), however this time may vary depending on when the snowfall begins and ends. There are no time guarantees as to our arrival time, however we strive to meet our target of 12 hours after the end of the snowfall.
5. In the event of severe weather conditions whereas these services cannot be provided due to the main roads not being cleared, clearing operations for the client shall resume as soon as possible once the roadways have been cleared.
6. Snow will be cleared from the driveway using a metal snow plow. In the event that some snow is inaccessible due to parked vehicles on the driveway, the contractor will not be able to remove this snow until the next snowfall, once the condition has been corrected.
7. Snow will be cleared, as defined in the Scope Of Work Section.
8. Ice melting products including salt and ice melter are not included and shall not be applied by the contractor. The maintenance of slippery and dangerous conditions ARE NOT included as per this contract. We assume no liability for such conditions. It is solely the responsibility of the

customer to provide their own measures to insure these conditions do not exist. We do not offer nor provide such services.

9. In the event the customers driveway is too slippery to remove the snow due to an ice storm or similar event the customer is responsible for the treatment of such conditions. Service to the property will be suspended until the conditions have been rendered safe to perform normal snow removal operations.
